WATER CONSERVATION

The world's water crisis is now a serious one that needs to be addressed right away and resolved sustainably in order to guarantee that everyone has access to clean, safe water. Many regions are already experiencing water scarcity and contamination, leading to health issues and conflicts over resources.

Conserving water is crucial for sustaining ecosystems, supporting agriculture, and ensuring access to clean drinking water for future generations. Additionally, reducing water usage can help lower energy consumption and decrease the strain on infrastructure during times of drought. Furthermore, conserving water helps to preserve aquatic habitats and protect biodiversity. It also plays a key role in mitigating the impacts of climate change by reducing greenhouse gas emissions associated with water treatment and transportation.

What was our role?

BSS B.Ed. Training College Alathur has taken the initiative to follow the Harith Ghar campaign from September 12, 2023. This initiative encompasses various activities taken upon by the five optional classes of our college, where each option deals with one of the essential elements of nature. The English option was put forth to be in charge of Water. Several activities were taken regarding this initiative.

Planning of activities

As part of the Harith Ghar campaign undergone in BSS B. Ed. training college, the students of the English option who were provided with the theme of water conducted a discussion session on November 3rd, 2023, about the topic 'Various methods to improve water conservation around the college premises.' All the students participated and discussed various methods that could improve water usage within the college.

PRINCIPAL,
B. S. B. Ed. Training College
Alathur (PO), Palakkad-Dy
Kerala - 578 541,

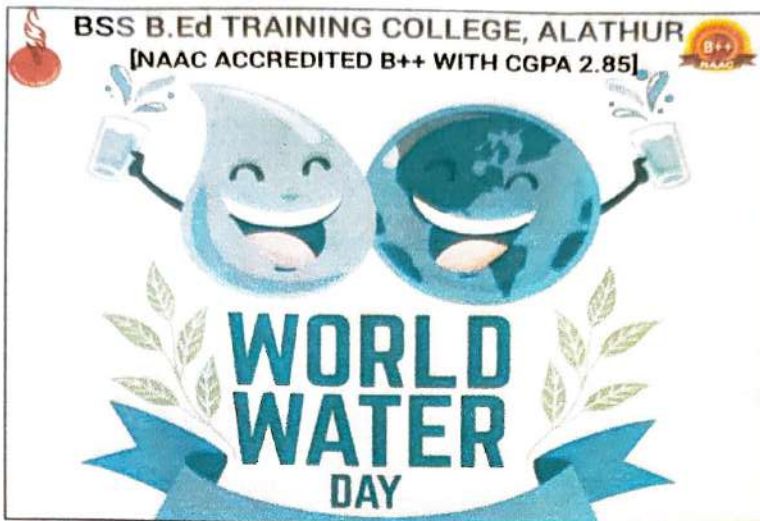

Several discussions were held, and activities were thoroughly planned. The primary aim was to implement actions within the campus that could induce water conservation. Various strategies were proposed, including installing water-saving fixtures and organizing educational campaigns. The goal was to raise awareness among students and staff about the importance of preserving water resources for a sustainable future. Several ideas were discussed and noted down. An official list of all the applicable ideas was written and submitted to the honorable principal, Dr. K.S. Balambika. Among many points that were discussed, rerouting and proper management of the water from the tank after it has been filled was a priority. Students discussed various methods to overcome this water shortage, including the fitting of various apparatus that can help control this flow, like pipes built directly into a water conservation tank rather than wasting away.

Many other points similar to the above-mentioned point were discussed in detail, and the important points were written down. The session of the Harith Ghar campaign ended with the formal submission of ideas and the acknowledgment of the principal to do whatever could be done to reduce water wastage.

Report on World Water Day

Along with the support of the commerce option, World Water Day was celebrated on March 22, 2024. Awareness about water conservation was the major priority of the day. The programme commenced with prayer and was followed by the inaugural address of the principal, Dr. K. S. Balambika.

All the students from each of the options participated in creating an awareness video about the importance of water conservation. Speeches from student representatives followed before playing the awareness video for everyone. An initiative to avoid using plastic water bottles to drink water was also taken into account on this day. The event came to a halt with the national anthem.

Report on Webinar

As part of the Harith Ghar campaign, in which water is a major part, the students of BSS B.Ed Training College, Alathur, attended a webinar conducted on April 22, 2024, by Mr. K. V. Dayal, Chief Faculty, Organic Farming, MG University, about the proper use of rainwater during the rainy season to better use water during the summer. The webinar was part of a series called "Krishiyiloode Oru Puthulokam." The webinar consisted of many important points about water conservation being communicated by Mr. K. V. Dayal. Many important works being done for water conservation were strongly discussed in the webinar. Many points that most human beings overlook, such as burning away matter, were also discussed, along with the importance of organic matter in the formation of water. Only 2% of the water on earth is available for human consumption, and it is important to save and conserve this at all costs.

B.S.S. B.Ed. Training College
Alathur (PO), Palakkad-Dist
Kerala - 578 541.

Recharging of wells was another important aspect discussed in the webinar. Various methods to increase the water level in wells, methods to clear and purify them, and the scientific aspects of this were thoroughly discussed. The webinar ended with a doubt-clearance session where participants were asked various questions related to the points discussed earlier.

The programme was a huge success, and all the students were able to learn more about water conservation and keeping the existing water clean and safe. The Harith Ghar campaign continues and more activities may be planned to further uphold the initiative with all its heart.

Report on the Experience sharing session

BSS B.Ed TRAINING COLLEGE, ALATHUR
(NAAC Accredited B++ with CGPA 2.85)
In collaboration with IOAC and Harith Ghar

Waves of change

"Insights and Learnings from the Water Conference: An Experience Sharing Session"

Date : 7 June 2024
Time : 9:30
Venue : Wisdom Hall

As part of the Harith Ghar campaign initiated in BSS B.Ed training college, a class related to the Water Conference 2024 was conducted officiated by **Pulthakidiyel Prince Jose** of English option, on 7 June, 2024, to discuss various important points mentioned during the conference that would help students get empowered related to water conservation.

PRINCE JOSE,
B.S.S. B.Ed, Training College,
Alathur (PO), Palakkad-20
Kerala - 878 531.

A detailed report was submitted vocally to the students and the teachers. The discussion topics were mentioned, and how the conference and various sessions influenced the participants was discussed in detail. Methods and techniques that relate to conservation and storage of rainwater were presented briefly based on the knowledge received from the researchers. All the points were noted point after point to help the audience relate to the topics. In a whole, the class was a great success and evidently encouraged the students as well as the teachers to dive deep into water conservation and understand the importance of saving water.
