School Internship

Education is most important among all of us. Every year, student instructors are dispatched to several schools for teaching experience. When returning to the institution, student or pupil teachers, as is customary, discuss their perspectives, concerns, experiences, and gains with their lecturers at the evaluation session. This input is useful in developing plans for the future session. The period of practice teaching is generally 4 months as per the new regulations of the University. Some challenges, experiences, and barriers remain the same for the majority of pupils. This study considers the numerous challenges that student teachers experience, as well as approaches to developing teaching practice to foster reflective teaching practice.

The benefit of this complete Teaching Practice activity is that it offers students and teachers a sense of success. They learn to take charge, acquire confidence, and enhance their classroom management abilities. Instruction practice should serve as a solid foundation for student teachers to acquire an aptitude for successful teaching. Rigor simulation sessions under the supervision of the trainee in charge can remove various problems. The teacher's training programme should not only provide theoretical knowledge of various theories of teaching-learning or abilities utilized in classroom teaching; rather, it should provide valuable experience in the development of an inspirational teacher. The contribution and participation of school teachers are made mandatory to revamp teaching teaching-learning process. But there is a gap between the trainee colleges and schools. There should be proper meetings and discussions among all stakeholders before conducting teaching practice so that the experienced teacher's involvement makes up the process of teaching practice with positive results.
